

Cardboard Tube Snowman

Get creative by making this cute cardboard tube snowman!

Take an old cardboard tube and turn it into a Christmas snowman with the help of some cotton wool, an old egg box and some card.

You will need:

- Cotton wool strip
- Glue
- Cardboard tube
- Googly eyes
- A strip of coloured paper
- Black card
- Orange card
- Scissors
- An egg box
- Black paint
- Paintbrush

1 Cut the cotton wool strip to size, then glue all around the cardboard tube and roll the cotton wool sheet around it.

2 Press the cotton wool firmly onto the tube to make it stick.

3 Stick on the googly eyes and make a triangle with the orange card for his nose.

4 Cut out small circles from the black card and glue them on to make buttons.

5 Wrap the strip of coloured paper around the snowman's neck, and stick firmly. Cut into the end of the strip to make tassels.

6 Finally, cut out one section of egg carton, paint it black and glue to your snowman's head to make his hat. Now he's ready to face the cold!
