Contents

- 1 jigsaw playing board • 4 bus boards • 4 bus counters • 4 stands • 40 passenger cards
- 1 dice • 1 spinner board • 1 spinner arrow

Setting up the game

Assemble the playing board.

Insert the bus counters into the matching coloured stands. Each player chooses a bus counter and a matching bus board.

Place the bus counters on the **bus start space** on the playing board.

Spread the passenger cards face up on the table.

Attach the plastic arrow to the spinner board and place the spinner and dice in reach of all players.

1 Roll the dice

The youngest player starts.
Roll the dice.

Move your bus counter along the route the number of spaces shown on the dice.

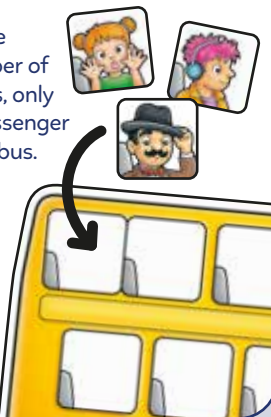

Once you have moved your bus, **spin the spinner** to determine how many passengers you pick up or drop off.

2 If you land on a space with a plus symbol

If you have landed on a space with a **plus** symbol, **pick up** the number of passenger cards indicated by the spinner and place them on your bus board. Play passes to the next player.

Note: If the number on the spinner exceeds the number of empty spaces on your bus, only pick up the number of passenger cards required to fill your bus.

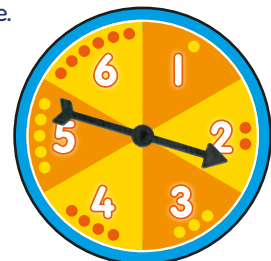

3 If you land on a space with a minus symbol

If you have landed on a space with a **minus** symbol, **drop off** the number of passenger cards indicated by the spinner from your board and return them to the table.

Play passes to the next player.

Note: If the number on the spinner exceeds the number of passengers you have on your bus you must drop off as many as you have. If your bus is empty you cannot drop off any passengers and play passes to the next player.

4 Play continues

Continue to move around the board until you reach the **star space** at the end of the route by the funfair. The exact number **does not** have to be rolled to reach the star.

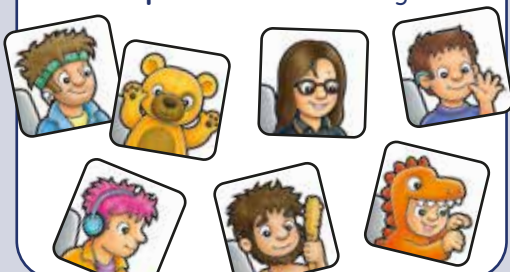

The game continues until **all players** have reached the star.

5 The winner

The winner is the player with the **most passengers on their bus when they reach the star space** at the end of the game.

For a more advanced game

For a more advanced game, write out the sum before picking up or dropping off passengers. For example:

- If you have 4 passengers on your bus board and you pick up 3 passenger cards the sum would be $4+3=7$.
- If you have 4 passengers on your bus board and you drop off 3 passenger cards the sum would be $4-3=1$.
